

HTML validator, CSS validator, resizer and GitHub:

The screenshot shows the Nu Html Checker interface in a web browser. The browser's address bar displays the URL `https://validator.w3.org/nu/#file`. The page title is "Nu Html Checker". Below the title, a message states: "This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change". The main heading is "Showing results for uploaded file index.html". The "Checker Input" section includes a "Show" dropdown with options "source", "outline", and "image report", and an "Options..." button. The "Check by" dropdown is set to "file upload", and the "Choose File" button is visible next to the text "No file chosen". A note below states: "Uploaded files with .xhtml or .xht extensions are parsed using the XML parser." A "Check" button is at the bottom of the input section. A green status bar at the bottom of the main content area reads: "Document checking completed. No errors or warnings to show." Below this, it says "Used the HTML parser." and "Total execution time 5 milliseconds." At the very bottom, there are links for "About this checker", "Report an issue", and the version number "Version: 17.11.1".

Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for uploaded file index.html

Checker Input

Show

Check by No file chosen

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

Document checking completed. No errors or warnings to show.

Used the HTML parser.

Total execution time 5 milliseconds.

[About this checker](#) • [Report an issue](#) • Version: 17.11.1

This screenshot is identical to the one above, but the main heading is "Showing results for uploaded file about.html". The "Choose File" button is still present, and the status bar at the bottom indicates "Total execution time 4 milliseconds.".
